The Mods

[The Mods](#)
[DS1 Seeing Eye Mod](#)
[Mod Your DS1](#)
[Seeing Eye Mod](#)
[ULTRA DS-1 Model](#)

Menu Options to the Right take you to the specifics of the two pedals Steve sent us.

Top view, left pedal is our Standard Seeing Eye Mod, right pedal is the new DS-Vai Model we came up as serious inspiration hit us working on these JEMS!

*I can tell you that the settings Steve has marked do sound very good. Even the subtle change in distortion levels you see marked on the left are enough to give you a great range. These pedals are now extremely dynamic with your picking attack. They clean up very well with the volume control on your guitar.*
